DESIGNA

Designa ELEMENTS SOFTWARE – ADD-ON
DYNAMIC PRICING

Software ADD-ON for flexible tariff structure

The ELEMENTS SOFTWARE ADD-ON DYNAMIC PRICING allows you to flexibly adjust the standard tariff for the use of your parking area to the respective occupancy at any given time.
The tariff adjustment is linked to tariff thresholds and tariff tables.
This gives you the flexibility to determine not only at which level of occupancy of your parking area a tariff increase will be applied, but also what the amount of the tariff increase will be.

FEATURES

- Flexible tariff structure for short-term parkers
- Dynamic pricing based on the corresponding occupancy of the parking area
- Freely definable tariff thresholds and tariff tables
- Tariffs change automatically
- Proven technology can be easily and reliably integrated into existing and new parking management systems

FUNCTIONS

Flexible tariff structure for short-term parkers
Flexible tariff structure allows for improved management of parking areas.

Dynamic pricing based on the corresponding occupancy of the parking area
The standard tariff for parking is automatically adjusted depending on the current occupancy of the parking area.

Freely definable tariff thresholds and tariff tables
Freely definable tariff thresholds and tariff tables allow you to flexibly determine at which parking space occupancy the tariff increases by which amount.

RECOMMENDED ELEMETS SOFTWARE ADD-ONS

- DESIGNA recommends the use of the ADD-ON DIGITAL SIGNAGE. Together with the DESIGNA Digital Information Board, the latest valid tariffs can be accurately signaled in the entrance lane.
