All training content is supported by digital hand-outs, web tutorials, individual checklists, e-courses and online surveys. Participants of a class training course continue to have access to the digital content even after the face-to-face event.
DESIGNA Blended Learning – the best of both worlds!

WHAT IS AN ONLINE TRAINING PLAN / AGENDA / SYLLABUS?

We haven't printed training plans for a long time. Instead, participants have access to a **course accompanying the training**. And this even if the training has already taken place. The courses accompanying the training are provided with links/hyperlinks; individual scripts and, for example, flip chart images are available to participants 24/7. Each participant has their own online training blog.
